

2020 ELECTION REPORT

The Math Just Won't Work

At the deadline hour on the evening of the November 3rd 2020, President Donald J. Trump had decisively won re-election by a massive landslide. Trump had garnered 11,231,326 more votes than he did when he won the White House in 2016. Americans showed up in record numbers to make certain that Trump would remain the leader of the free world for another four years.

Trump received 4,717,638 more votes than Barack Obama in 2008, 8,300,359 more votes than Barack Obama in 2012, and 8,362,640 more votes than Hillary Clinton in 2016. Trump's victory was certain, but that was as of the voting deadlines on the evening of November 3rd, 2020. After midnight ballot dumps in multiple democrat controlled states and cities, along with highly questionable ballot counting by select vote tabulation softwares would throw the elections into a tailspin by break of day.

For the first time in 245-years, 69% of votes were cast by unconventional methods, making the verification of legitimate election results extremely difficult at best. Millions have been spent trying to investigate the events of that evening while political operatives in the media and courts have worked to interfere with or block all efforts to unravel the rat's nest of voting data which resulted in an active overthrow of the duly elected government via massive fraud, on a scale never before seen.

"In the 2020 election, 69% of voters nationwide cast their ballot nontraditionally — by mail and/or before [and after] Election Day. This is the highest rate of nontraditional voting for a presidential election since questions regarding voting method have been included in the survey. By comparison, about 40% of voters cast their ballots by mail and/or prior to Election Day in 2016." ([source](#))

THE CHALLENGER

Throughout the 2020 Democratic Party primaries, candidates Sanders and Warren led the field with comfortable leads throughout. Joe Biden ran a distant 3rd behind the two, never breaking the 32% mark within his own party primaries, losing Iowa, New Hampshire, and Nevada in the early going. Even Pete Buttigieg had taken Iowa from Biden, after caucus irregularities held up certification for days.

Kamala Harris had dropped out of the primaries early due to a total lack of support from democrat voters, finishing dead last. Just ahead of the DNC convention, party leaders met with Sanders and Warren to talk them into dropping out of the race to make room for Biden to secure the party nomination. Even then, Biden was nominated by only 53.3% of democrats to become the 2020 presidential nominee for the DNC. 46.7% of democrats did NOT support Joe Biden for the party nomination, even after everyone else dropped out of the race.

2020 DNC PRIMARY POPULAR VOTES

BIDEN	19,076,052	53.3%
SANDERS	9,679,213	27.0%
WARREN	2,831,472	7.9%

BLOOMBERG	2,493,409	7.0%
BUTTIGIEG	924,237	2.6%
KLOBUCHAR	529,713	1.5%
GABBARD	273,940	0.8%

According to [official reports](#), as of February 2020, the USA had 115,273,738 registered voters. However, the federal government was reporting 153,300,000 registered voters as of the 2018 mid-term elections, and 168,000,000 by the 2020 elections. A record increase in NEW voters by 14,700,000, just between November 2018 and November of 2020...

This wide range of alleged registered voters, grew by 52,726,262 new voters between February 2020 and November 3, 2020. It's mathematically impossible for this to be true. But it is the only way Joe Biden could have overcome the enormous popularity of President Trump, who received a record 17.8% increase in voter support between 2016 and 2020, as compared to Obama who lost 3,582,721 voters (5.2%) in his bid for re-election.

According to the final "certified" election results, Joe Biden had defeated President Trump by 7,052,770 votes with a grand total of 81,268,924 votes counted, to become the 46th President of the United States. That's 11,770,408 more votes than Barack Obama in 2008, 15,353,129 more votes than Obama in 2012, and 15,415,410 more votes than Hillary Clinton in 2016. This, for a candidate that was nominated by only 53.3% of his own political party a few months earlier.

Where did all of these votes come from?

Is it really possible that Joe Biden, with 53.3% support in his own party, defeated the most popular American President since Ronald Reagan? Is it possible that Biden received millions more votes than Barack Obama ever dreamed of, or any presidential candidate in the entire history of the United States...with only 53.3% support from his own party?

Facebook CEO [Mark Zuckerberg "donated" over \\$400-million to the democrat party](#) just weeks ahead of the general election, for the stated purpose of placing ballot drop boxes all across the country.

*A year-long investigation into voter fraud in **Georgia** is set to become a reality with arrests and charges brought against those who harvested ballots illegally in 2020 on a scale never before imagined, says John Fredericks, host of "Outside the Beltway." ([source](#))*

Zuckerberg drop boxes were set in place to cover massive [democrat party ballot harvesting](#), dumping millions of illegal ballots into the drop boxes, later picked up and delivered in the dark of night in certain democrat controlled districts. \$400-million worth!

Hans von Spakovsky, a former Federal Election Commission member, said the billionaire Facebook founder's donations to a pair of nonprofits that doled out the cash to nearly 2,500 counties in 49 states "violated fundamental principles of equal treatment of voters since it may have led to unequal opportunities to vote in different areas of a state." ([source](#))

In addition, millions of ballots were cast by mail, with no verification of voter registration, no voter ID, no proof of district residency, and no means of adequately verifying the legitimacy of those ballots. In numerous investigations, addresses given for these mail-in ballots turned out to be empty lots, or hundreds of ballots listed from the same address.

Over [7,000 sworn affidavits](#) delivered to **Michigan** lawmakers claim election fraud, under penalty of perjury. But [Michigan Republican lawmakers](#) worked with state democrats to bury the evidence of massive election fraud.

In **Pennsylvania**, [Officials are Hiding Evidence of Election Fraud](#). However, on January 14, 2022, “A *Pennsylvania Commonwealth Court* denied a request by legislative Democrats and Attorney General Josh Shapiro to block the release of voters’ information to the Senate Intergovernmental Operations Committee investigating the 2020 general election and 2021 primary.” ([source](#))

It is the most massive election fraud in human history and the basic math involved makes a Biden victory entirely impossible. Evidence of massive fraud by numerous methods has been uncovered and exposed for over a year now. Despite unparalleled efforts by federal and state democrats [and Republicans], and their democrat controlled news media to keep a tight lid on the fraud, the truth is eventually breaking daylight, as the truth always has and always will.

Since the Fraud

A year ago, Biden and Harris made history in the most fraudulent election in the history of elections, worldwide. But a year later, they have set another world record for the most disastrous U.S. Administration in 245-years of American history. Today, Biden and Harris have the same [low approval ratings](#) they had during the 2020 Democrat Primaries, with even most democrat voters now opposed.

Not only do the two hold the world record for the most fraudulent administration in human history, but they also hold the U.S. record as the [most unpopular White House occupants in 245-years](#) of American history. In just under 12-months, Biden and Harris have literally destroyed everything in America, including what little support they once had in their own party.

This is to be expected when you are an administration that stole your position of power by hook and crook, only to immediately prove exactly why you had to steal the election in the first place. Joe Biden is a 40-year criminal career politician with absolutely no accomplishments to his name. Harris is even less...and together, they make the most dangerous political team since Bill and Hill in the 90s. Never has so much damage been done in so little time.

What “THE PEOPLE” Can Do

Just this morning, we received a private email from a friend, Lee.

“AZ State Rep Mark Finchem returned my call last week. He is totally on our side pushing for decertification. But he said decertification will NEVER happen as long as Russell Bowers is the Speaker of the House.”

Proven for many years now, is the reality that politicians are very predictable, in the sense that they will play politics with even the most dangerous and outrageous of issues, so long as the people will allow them to do so.

It’s not politicians, new media, partisan political appointees in the courts or social media giants, Dr. Fauci or Bill Gates who were supposed to be “forever vigilant” against the destruction of our Constitutional Republic, it’s “We the People.” The future of freedom and liberty was never entrusted to mere power-drunk greedy political operatives or their purchased minions in the government controlled press. It was entrusted to “We the People!”

It’s ALL up to the American people, not their poorly qualified self-serving public servants.

Sadly, the COVID event has placed widespread public ignorance, apathy, and lack of personal decision-making ability on display. Almost nobody who has taken one of the lethal “vaccines” did so in pursuit of better health. Almost everyone who fell victim to the global hoax and surrendered to the “vaccine mandates” did so out of fear, to protect their job, or their travel plans, or their relationships with others who talked them into it.

Two years later, many of them are slowly learning what millions of us knew two years ago. Many of them are joining our ranks to say, NO MORE! The same people who asked no questions before taking a lethal injection, failed to ask any questions about the 2020 elections too.

But for those who have been asking the right questions all along, or are asking the right questions now, what happens next will be up to them, both as it pertains to Nazi-style COVID mandates and massive election fraud.

Evil can only prevail when good people do nothing! So, if the people stand together and put their common cause of freedom, liberty, honesty, decency and justice on the front burner, politicians will soon find themselves doing the right things for a change. Not because they have suddenly become better people, but because they won’t have any choice in the matter.

Politicians will do the right things, when it means their own self-preservation, and not until. It’s the job of the American people, to place them in the position of having to do the right things. That’s what “the people” can do!

The facts and data are on our side. The people just need to make it matter! They had best do it soon!
